NOTES

The following transcription is intended only for performing purpose and doesn’t seek any critical goal.

The notes’ values accindentals and colourings are as in the original manuscript, apart from the perfect breves that are dotted.

The C clefs are transposed to the G clef and the modern Tenor clef.
The second voice is derived from the Superius following the prescription “faulx bourdon”
This Kyrie has to be sung completely in polyphony, without the 2nd, 4th, 6th and 8th plainsong sections, following the time signatures top to bottom.

Instead of marking the “ligaturæ” with the usual square brackets, I tried to keep their original shape, as far as possible in the score alignment, to make them more visible. To represent the notes’ values I used the following rules (simplifying the old ones):
- the left upstemmed notes are semibreves
- the notes without stem are breves
- the right downstemmed notes are longæ

I decided to keep the original manuscript’s text placement, positioned above the staves, to leave the performers the freedom to make the effective text placement at their own judgement.

In the music before the baroque, the Time Signatures are intended just only as “time” prescription, i.e. which note value as to be counted (mensura) and how the different note values are to be divided (perfection and imperfection). This music is above all a vocal music and its rhythm (the accents) is based upon the text rhythm (the text accents) either following or contrasting it. The text rhythm being not modular by definition, forcing a bar division, i.e. a modular rhythm, upon this music is a theoretical error involving practical ones: to put the accents in the wrong places and to prevent a correct understanding of the melodic flowing.

The single parts are put together in score for a better overall sight of the harmonic, melodic and rhythmic structure of the composition.

If you have any doubt you can download the fac simile of the manuscript from the following address:
